

2004 Order Form Instructions

The 2004 versions of child support calculators from Bradley Software use a new licensing technology. It is faster for you to license software and more secure than previous versions.

The best way to take advantage of this new technology is to load the demo software, either by downloading it from our web site or ordering a demo CD from us. Once the demo software is loaded, run the software. Click on the HELP menu, click on "To purchase a license" and then "Purchase by FAX/USMail". This will run an automated FAX-in form program.

Of course you can also continue to purchase using our on-line software purchasing store.

Once you purchase a license, our support desk will email or fax you a registration code that you will use to license the demo product for full use. You will not have to reload any software.

The attached order form can be used in case you would rather just fill out the form by hand and send it to us. It's not a problem to licensing this way, it just takes a few extra steps.

If you have questions about this process please email us at:
