

2009 Version Software Licensing Guide

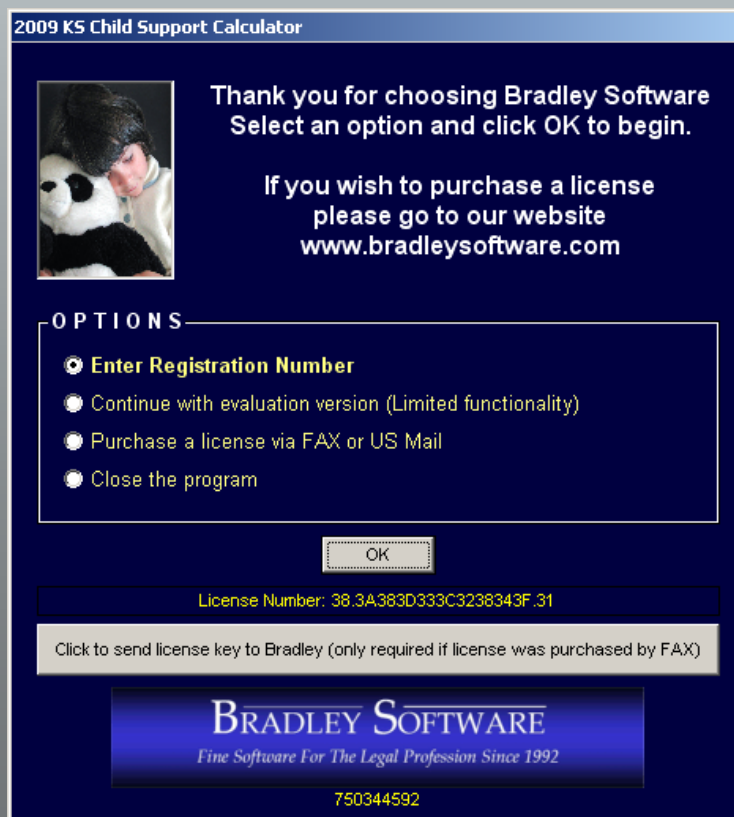

Licensing the 2009 version of Bradley software is quite different than the past year. This guide will step you through this improved and much quicker process. Remember, you can always call Bradley Software for FREE Technical support at (913)491-4476 or send email to techsupport@bradleysoftware.com

Before you begin make sure that the TRIAL program is loaded on your computer. The registration code will enable the software to work only on the specific machine it is designated for.

Figure 1

Step 1

Run the Program and get to the Welcome Screen

License Number: 38.3A383D333C3238343F.31

Click to send license key to Bradley (only required if license was purchased by FAX)

BRADLEY SOFTWARE
Fine Software For The Legal Profession Since 1992

750344592

Click on the REGISTER option and click the OK button

Click "Send license number to Bradley Software" if you need a registration code and have not received one. Instructions will be shown when you click on this button

2009 Version Software Licensing Guide

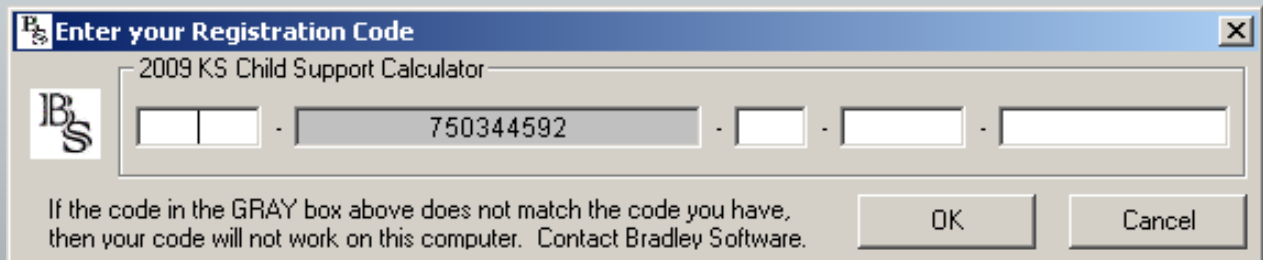

Initial Licensing - when you know your registration code

Step 3

Click on the REGISTER button.
A new window appears.

Step 4

Type the license code into the areas
supplied.

NOTE:

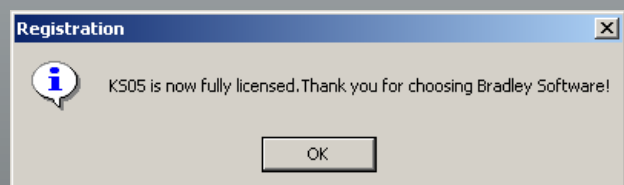

The grey text area is pre-filled and should match the registration code you received. If it does not, then contact Bradley Software.

Click OK.

If the license code is valid the following window appears.

Your program is now fully licensed!

Follow these steps for each program you wish to register.

2009 Version Software Licensing Guide

Used when you are transferring a license from another computer

A license is like a token. Once you have one you can move it from one computer to another. But it can only exist on one computer at any given time.

This guide shows you how to transfer the license that exists on one machine (the Source), to another machine (the Target).

Basic Overview

(See page 6 for detailed instructions)

Step 1

Install the TRIAL program on the **TARGET** - get the license code.

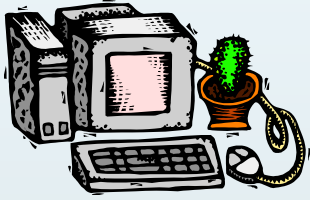

Step 2

Run the REGISTRATION DASHBOARD program on the **SOURCE** - type in the license code from the **TARGET**. You will receive a registration code.

The **SOURCE** is now converted back to a TRIAL program.

Step 3

Type in the registration code from the **SOURCE**. The **TARGET** is now licensed for full use!

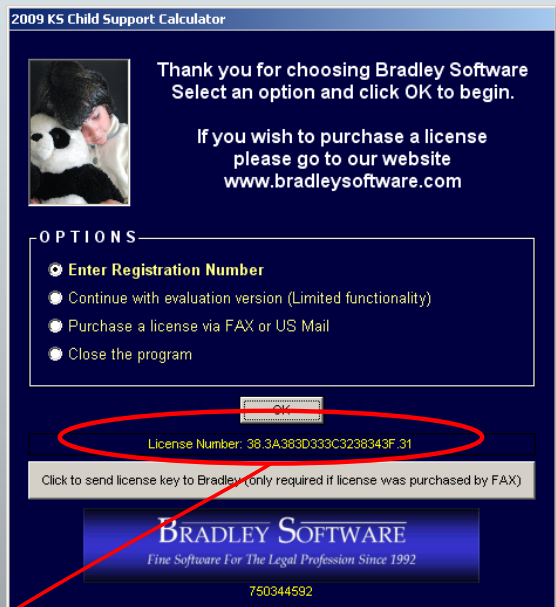

SOURCE computer
 (The one you are moving the software from)

TARGET computer
 (the one you are moving the software to)

Step 1

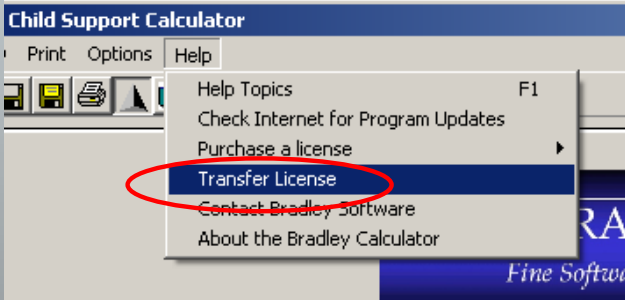

Run the Program you want to license.

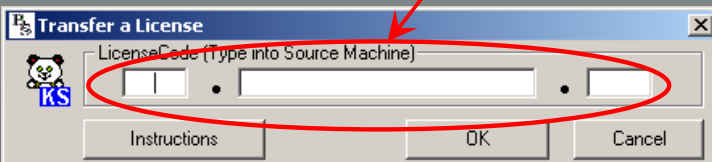

Write down the number circled above and take this code into the **SOURCE** computer.

Step 2

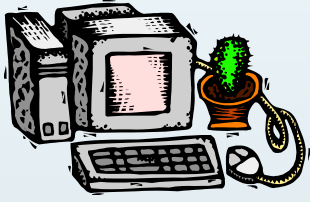

Run the licensed program. Click on **HELP** then click on **TRANSFER LICENSE**

A new window appears.

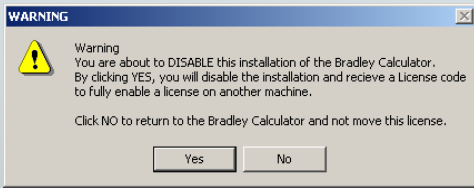

Type in the number from the **TARGET** Machine. Click **OK**

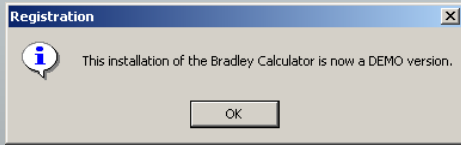

SOURCE computer
 (The one you are moving the software from)

Step 2 (cont'd)

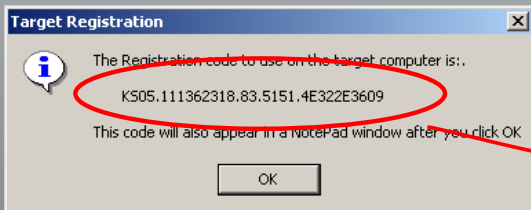

If you are absolutely sure, click YES

The Source program is now a TRIAL PROGRAM.

A registration code window appears. Write down the registration code.

Take the registration code to the TARGET computer.

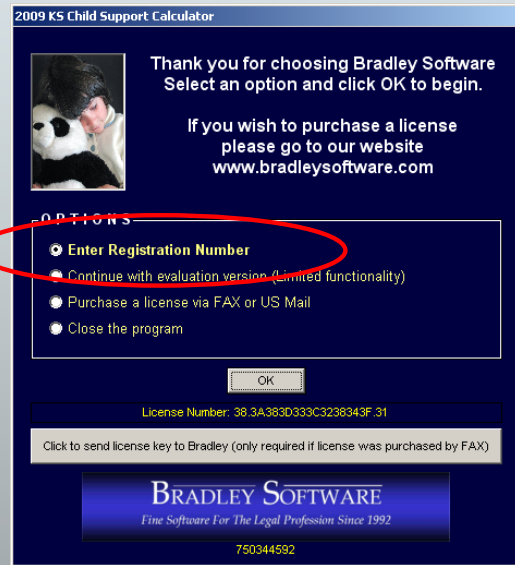

You are now finished with the Source computer. You can uninstall the Trial program if you want.

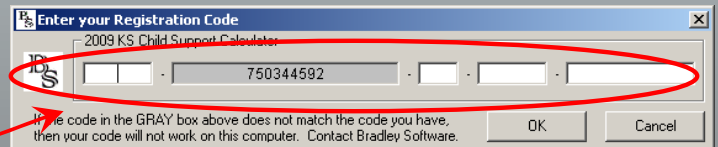

TARGET computer
 (the one you are moving the software to)

Step 3

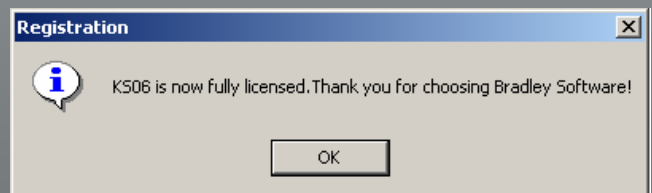

Select REGISTER and click on the OK button.

A new window appears.

Type the registration code from the SOURCE computer into the fields. Click NEXT

Congratulations! You are now finished and the license has been transferred to the Target computer.
