2019 License Transfer Guide
Used when you are transferring a license from another computer

A license is like a token. Once you have one you can move it from one computer to another. But it can only exist on one computer at any given time.

This guide shows you how to transfer the license that exists on one machine (the Source), to another machine (the Target).

IMPORTANT:
This process can be slightly different depending on whether you purchased on-line or not.

*You don’t have to remember if it was purchased on line or not, the program will do that for you.*

The difference is just that you will see different screens for receiving and entering the registration codes.

As you run the transfer function you might see slightly different screens.

Page 2 to 4 shows you the process for when you had purchased on-line.
Transfer Overview

A license is like a token. Once you have one you can move it from one computer to another. But it can only exist on one computer at any given time.

This guide shows you how to transfer the license that exists on one machine (the Source), to another machine (the Target).

![Source and Target Diagram]

Basic Overview
(See page 3 for detailed instructions)

Step 1
Install the TRIAL program on the TARGET - get the license code (if needed)

Step 2
Run the REGISTRATION DASHBOARD program on the SOURCE - type in the license code from the TARGET (if needed).
You will receive a registration code.
The SOURCE is now converted back to a TRIAL program.

Step 3
Type in the registration code from the SOURCE. The TARGET is now licensed for full use!
Transfer – First Steps

Step 1
Install the Trial program in the PC that you want to move the license to.

Step 2
Run the licensed program. Click on HELP then click on TRANSFER LICENSE

A new window appears.

The next window will appear. Depending on how it looks follow these instructions

If it looks like this then go to page 4

If it looks like this then contact Bradley Software
Step 3

Enter the Order Number and Key Code from the SOURCE computer.

Click OK

You are now done and the new computer is licensed.
